

Lights OUT - Audition Script

SKIT 1

Maybe it's not me that needs to wake up. Maybe.... it's you. Maybe I'm the only one who's awake. I have to help you. I haven't been able to sleep for weeks, the medication, it fucks with you. It's not what she says it is. Don't trust her. Don't trust any of them. We are just their guinea pigs. You need to wake up and see the truth - we are the midnight experiment.

We are the animal trials, we are the guinea pigs! And if you don't react to the medication positively, she will keep you here forever. Don't tell her about the side effects. Don't tell her anything. They've been waiting for you. They've been watching you. This is their game. Don't let them win.

SKIT 2

Hello, sir. It's been a while since I've seen an individual walk 'bout these trails. People think it's the snow that has kept expeditions from going up to the summit. No sir, that ain't the truth. Rumor has it, travelers have spotted the legendary Sasquatch. I don't believe it, but I'm starting to think it's true considering that I haven't seen many return back to this outpost after climbing the summit.

Take this lantern, you'll need it for this neck of the woods. Basecamp is 'bout 6 miles up and snow levels are expected to die down. You be careful out there. Eyes wide open, stay focused, and don't head into the outskirts. Be gone now.
